

Notice: Over the next few months, we're reorganizing the App Engine documentation site to make it easier to find content and better align with the rest of Google Cloud products. The same content will be available, but the navigation will now match the rest of the Cloud products.

**JUMP TO** (#)

## App Engine

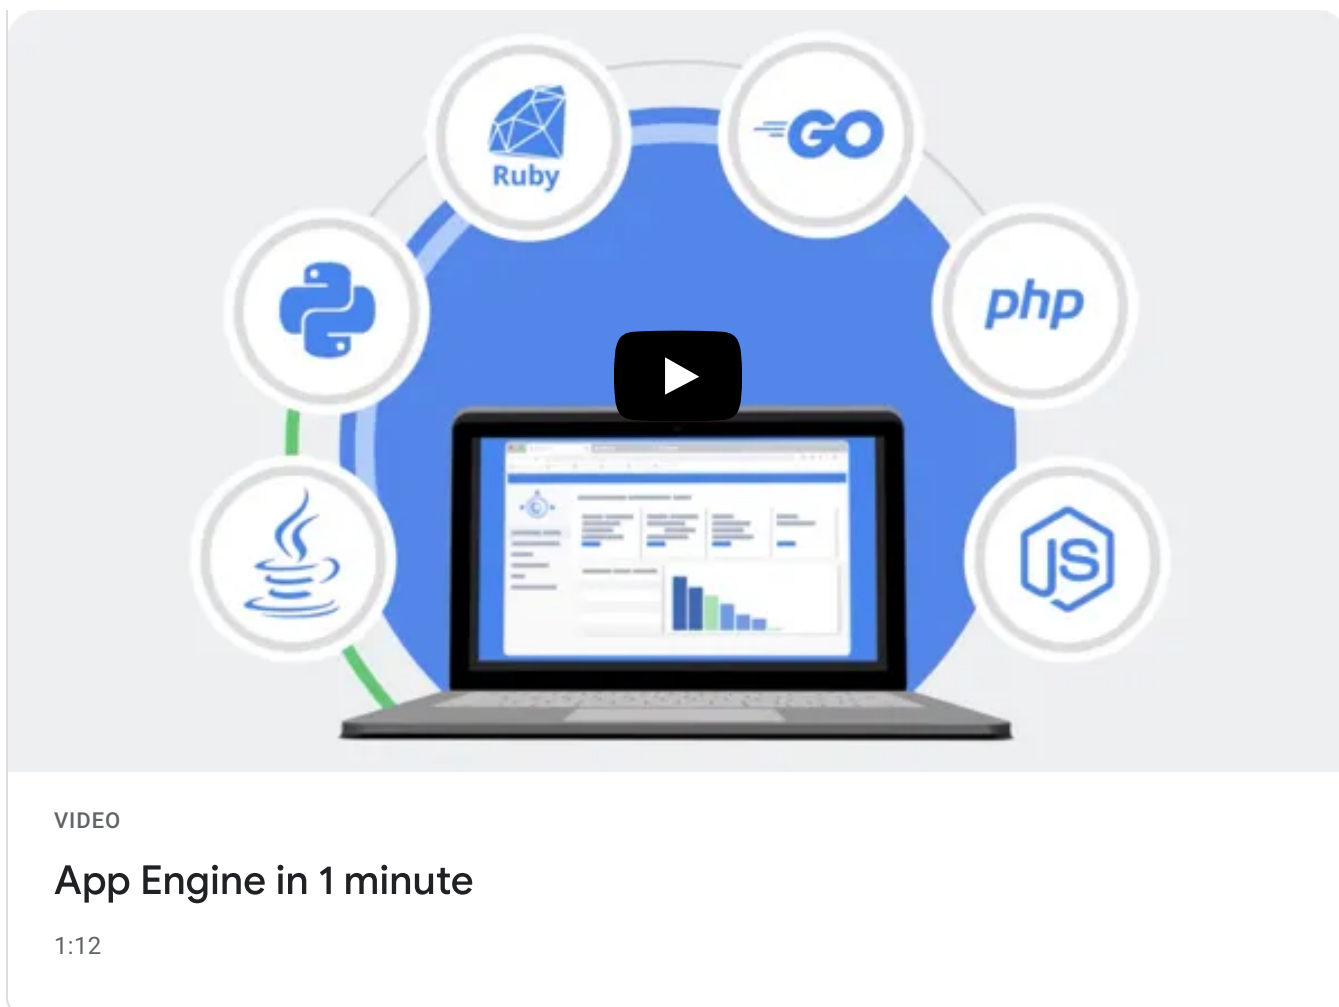

Build monolithic server-side rendered websites. App Engine supports popular development languages with a range of developer tools.

New customers get \$300 in free credits to spend on App Engine. All customers get 28 instances in standard environment free per day, not charged against your credits.

**Try App Engine free** (<https://console.cloud.google.com/freetrial>)

#### KEY FEATURES

## Key features

### Popular programming languages

Build your application in Node.js, Java, Ruby, C#, Go, Python, or PHP.

### Fully managed

A fully managed environment lets you focus on code while App Engine manages infrastructure concerns.

## Documentation

### GOOGLE CLOUD BASICS

#### Choosing the right App Engine environment

Learn how to run your applications in App Engine using the flexible environment, standard environment, or both.

**Learn more** (</appengine/docs/the-appengine-environments>)

### GOOGLE CLOUD BASICS

#### App Engine standard environment

See how the App Engine standard environment makes it easy to build and deploy an application that runs reliably even under heavy load and with large amounts of data.

**Learn more** (</appengine/docs/standard>)

### GOOGLE CLOUD BASICS

#### App Engine flexible environment

Find out how App Engine allows developers to focus on what they do best: writing code.

**Learn more** (</appengine/docs/flexible>)

#### PATTERN

Looking for other serverless products?

If your desired runtime is not supported by App Engine, take a look at [Cloud Run](https://cloud.google.com/run).  
(<https://cloud.google.com/run>)

#### ALL FEATURES

### All features

#### Popular languages

Build your application in Node.js, Java, Ruby, C#, Go, Python, or PHP.

#### Fully managed

A fully managed environment lets you focus on code while App Engine manages infrastructure concerns.

### **Powerful application diagnostics**

Use Cloud Monitoring and Cloud Logging to monitor the health and performance of your app and Cloud Debugger and Error Reporting to diagnose and fix bugs quickly.

---

### **Application versioning**

Easily host different versions of your app, and easily create development, test, staging, and production environments.

---

### **Application security**

Help safeguard your application by defining access rules with App Engine firewall and leverage managed SSL/TLS certificates by default on your custom domain at no additional cost.

---

### **Services ecosystem**

Tap a growing ecosystem of Google Cloud services from your app including an excellent suite of cloud developer tools.

## **PRICING**

### **Pricing**

App Engine has competitive cloud pricing that scales with your app's usage. There are a few basic components you will see in the App Engine billing model such as standard environment

instances, flexible environment instances, and App Engine APIs and services. To get an estimate of your bill, please refer to our [pricing calculator](/products/calculator#tab=app-engine) (/products/calculator#tab=app-engine).

App Engine runs as instances within either the standard environment or the flexible environment.
