

Infrastructure Automation & Compliance at Enterprise Scale

Puppet enables you to deploy and manage infrastructure with confidence.

FREE TRIALREQUEST A DEMO

Maintain a Desired State

Manage and automate more infrastructure and complex workflows with reusable blocks of self-healing infrastructure as code.

ABOUT AUTOMATION

Deliver Better Infrastructure, Faster

Quickly deploy infrastructure to support your evolving business needs at will (and at scale) with model-driven and task-based configuration management.

ABOUT DEPLOYMENT

Increase Operational Efficiency

Automate the full infrastructure lifecycle to eliminate siloes, reduce response time, and streamline change management.

ABOUT EFFICIENCY

Ensure a Compliant & Secure Posture

Puppet's automated policy enforcement enables continuous compliance with the ability to find, report, and fix errors and enforce desired state across your infrastructure.

ABOUT COMPLIANCE

Grow with the Puppet Community

Our vibrant community contributes constantly to Puppet. Get started quickly with pre-built content & workflows from Puppet and our open source community.

ABOUT COMMUNITY

Deep DevOps & Enterprise Experience

Puppet is a pioneer and thought leader in DevOps. More importantly, we work as a trusted advisor helping the largest Enterprise customers in the world rethink & redefine how they manage their IT environments.

ABOUT DEVOPS

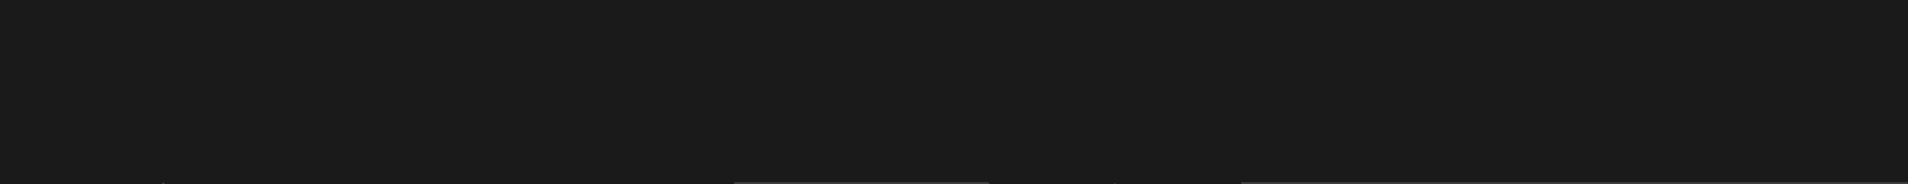

Run Puppet on Any OS, Anywhere

Scale beyond single operating systems & teams to cross-functional deployment with a common methodology and a unified set of code across all enterprise operating systems from on-prem to the cloud.

ABOUT SCALE

Trusted by the Best

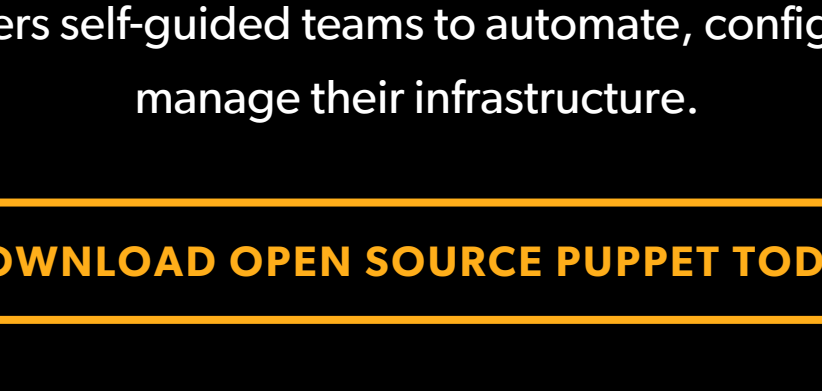

Puppet leads the industry in infrastructure management at scale across more than 40,000 organizations, including 80% of the Global 5000. With Puppet, you're in great company.

A Puppet Product for Every Org

Our customers rely on Puppet to pull the strings across their IT infrastructure – from the data center to the cloud – to increase efficiency, strengthen their security posture, and boost business resiliency.

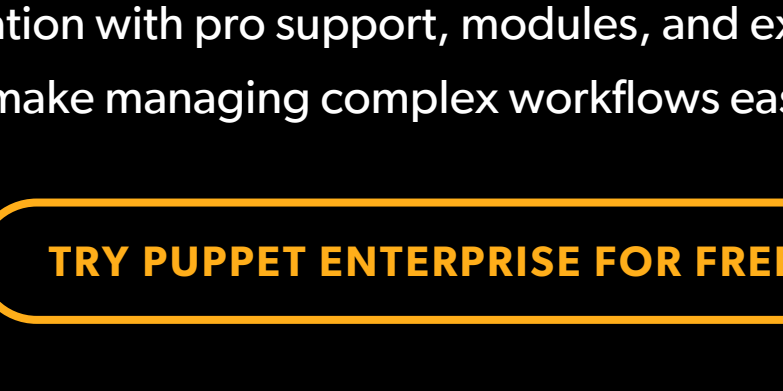

Community-Supported Open Source

The original, freely downloadable Puppet experience that empowers self-guided teams to automate, configure, and manage their infrastructure.
